SUMMARY

Final-year CS and Psychology student at the University of Melbourne, with 2+ years designing and building products across automotive HMI, fintech, healthcare, and logistics. I work across research, wireframing, interaction design, and frontend — and hand off directly to engineers.

EXPERIENCE

UX Design Intern - Automotive HMI | HARMAN International

Nov 2025 - Jan 2026

In-Vehicle Infotainment | Interaction Design | Design Systems | Figma

- Worked on interaction design for in-vehicle infotainment systems across multiple OEM brands - wireframing, interface architecture, and HMI surfaces for both dashboard and mobile companion platforms, with WCAG accessibility applied throughout.
- Built a Figma design system (spacing tokens, colour system, typography scale, interactive states) that cut developer handoff time by 30%; tracked design tasks in Jira and maintained documentation in Notion.

Lead Designer and Scrum Master | Univ. of Melbourne - Capstone

Jul - Nov 2025

Product Lifecycle | Agile/Scrum | User Research | Usability Testing | MERN Stack

- Design lead and Scrum Master for a 5-person team building Vouchr, a substitute marketing platform; ran user interviews, created personas, mapped user flows and journey maps, and managed the sprint backlog in Jira from research through to deployment.
- Designed the UI in Figma - wireframes to final screens - and built core features in MERN + SQL; usability testing and heuristic evaluation improved task-completion rate by 22%.

Financial Analytics Intern | Ernst and Young LLP

Nov 2024 - Feb 2025

Python | SQL | Machine Learning | NLP | Financial Modelling

- Built LSTM and XGBoost models hitting 97% accuracy for stock-market forecasting using NLP sentiment analysis on financial news; analytical outputs were adopted by 2 client investment firms in the Middle East.
- Automated data pipelines in Python and SQL, cutting analyst workload by ~60%; supported the advisory team on IPO financial modelling and client-facing documentation.

UX Designer - BCI and Assistive Technology | Melbourne BioInnovation

Jun 2024 - May 2025

User Research | Eye-Tracking | Hardware UX | Accessibility | Design Systems

- Designed UX for a BCI and gaze-tracking retrofittable wheelchair - user interviews with patients and clinicians, persona development, user flow mapping, and a real-time feedback UI built around embedded-display and accessible mobile constraints.
- Built the brand identity and design system including WCAG-compliant accessibility guidelines; community engagement grew 37% and design specs were handed off directly to hardware engineers.

UI/UX Design Intern | Matrix Freight Forwarding Systems

May - Sep 2023

Figma | Wireframing | Responsive Design | HTML/CSS | Usability Testing

- Designed wireframes and mockups using eye-tracking data and heuristic evaluation; built a responsive HTML/CSS frontend; SEO improvements drove a 28% increase in organic traffic.
- Mapped user flows for freight booking and tracking; usability testing surfaced 3 pain points, with fixes reducing support queries by ~15%.
- Built a Figma component library for booking, tracking, and notification patterns; handoff specs reduced back-and-forth with the dev team during implementation.

SKILLS

Design	Figma Framer Wireframing Interaction Design Prototyping Accessible Design WCAG 2.1 Jira Notion Adobe CC (Ps, Ai, Id, Pr, Ae)
Engineering	React TypeScript Node.js Python SQL HTML/CSS JavaScript Java Git Arduino Raspberry Pi
Product	Agile/Scrum Sprint Planning Backlog Grooming OKRs Stakeholder Management Design QA Cross-Functional Delivery

PROJECTS

Exousia - Piezoelectric Energy Floor

Arduino | Figma | Fusion360

Designed and engineered piezoelectric floor tiles powering 25+ classrooms from foot traffic - full product design, PCB layout guidance, brand identity, and investor pitch materials. Winner: FICCI Arise | TGELF Youth India STEM Product.

JOY - Mental Healthcare App

Figma | Swift | HTML/CSS

Designed and built a mental healthcare app with AI therapy plans, journaling, and music therapy; iOS UI in Swift with WCAG accessibility compliance - reduced onboarding by 25%, increased user engagement by 30%. Winner: Boston Hackathon 2022; pending hospital licensing.

EDUCATION

BSc Computing and Software Systems | Psychology Minor | University of Melbourne

Jul 2023 - Jul 2026

Algorithms and Data Structures | Database Systems | Software Modelling and Design | Object-Oriented Software Development | Mind, Brain and Behaviour | Music Psychology | Psychological Research Methods

Science Ambassador | Peer Mentor | Campus Leader at Notion | Innovation Lead at Google Dev Club | Competitions Lead at CISSA | Graphic Designer at MUR
